

White Paper of Coin & Products

The price of the coin SISC continues to rise!

SISC (Shirushi Coin) is a cryptocurrency by the Shirushi Group, a Japanese Web3 semiconductor manufacturer. The group uses a portion of its semiconductor sales to purchase SISCs, thereby driving up the coin's price in line with the demand for Web3 semiconductors.

SISC price trends so far!

Since its launch in 2022, the price of SISC has risen steadily alongside Shirushi Group's product sales, at times reaching 6.5 times its initial value. The price is expected to continue increasing with the growing demand for Web3 semiconductors.

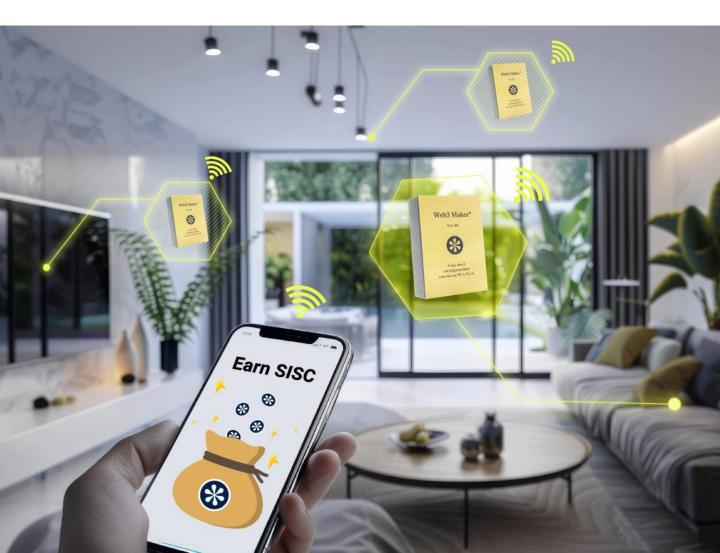

Blockchain as a necessity for life!

The Shirushi Group is bringing 'Earnable Home Appliances' to the world.

The 'Earnable Home Appliances' are home appliances that can be controlled via Web3 and can be mined for SISC!

Owners of these appliances can enjoy both rewards and a convenient life.

Already listed on major crypto asset exchanges!

SISC is listed on two exchanges, BitMart and PancakeSwap. Both exchanges are highly reputable with over 5 million users. SISC plans to list on more exchanges in the future. BitMart:https://www.bitmart.com/invite/VQ9pkq/en

Structure of price increases due to reduced mining volumes.

SISC with a price increase structure due to a 10% annual decrease in mining volume

SISCs issued by Shirushi Group have fixed maximum and annual issuance limits, preventing unlimited supply and price collapse. A decrease in the mined amount creates an upward price structure, increasing coin value and benefiting early coin holders.

Company profile

Solid Japanese company providing technology to support SISC (Shirushi Inc.)

Main Office

Shirushi Inc., headquartered in a Tokyo public facility, is a leading semiconductor manufacturer known for its high-performance hardware. Managed by pioneers from a Crypto Asset Exchange, the company drives Japan's technological innovation and future advancements.

Tama R&D Center(Tokyo)

Tama R&D Center is a facility for technological innovation. Located in a public facility of the Tokyo Metropolitan Government, it focuses on the development of Web3 technology and in-house hardware. It also plays an important role in supporting our global expansion.

Domestic branch office

Akihabara Sales Office

For customer convenience, we have a sales office in Akihabara, offering extensive face-to-face support for both local and out-of-prefecture customers.

Toyama Branch

The data center, occupying a building by Shirushi Inc., has an efficient operation and maintenance system, ensuring Web3Maker's safe operation. Toyama's advantages include its firm ground, low earthquake risk, and Japan's cheapest electricity.

Global sibling companies

SRS Inc.

SRS Inc, a Bahamian company, is the issuer of SISC.Web3 leading company capable of providing advanced blockchain services such as mining boosting.

SRS SG PTE LTD

The Singapore subsidiary (SRS SG PTE LTD) is the main sales office for the international market. It ensures efficient international trading and service provision.

Management and Crypto Asset Development Team

Representative Director and CEO Manabu Sakurada

• Group Head, FX Group, Monex, Inc.: Drove revenue growth in the currency exchange business.

• Founding member of Decurrent (now part of Sony Group), a crypto asset exchange linked with IIJ.

• Leveraging 20 years of financial experience to develop a Web3 economic zone in finance.

President, COO and CTO Naoki Okura

Advanced technician at IIJ, demonstrating blockchain technology.
Founding member of Decurrent (now part of Sony Group), focused on business and system design, and helped acquire the crypto asset exchange business.

• Independently developed the crypto asset 'Shirushi Coin'.

• Designed and built the world's smallest mining machine 'Web3Maker®', advancing Web3 technology.

SISC Mining

Mining machine with an almost zero electricity bill!

The Shirushi Group's Web3 Maker® offers innovative cost performance compared to conventional mining machines. It is the world's first low-cost mining machine with an almost zero electricity bill, no cooling system and no need for a large piece of land!

Web3Maker® Service site : https://web3maker.io/lp2

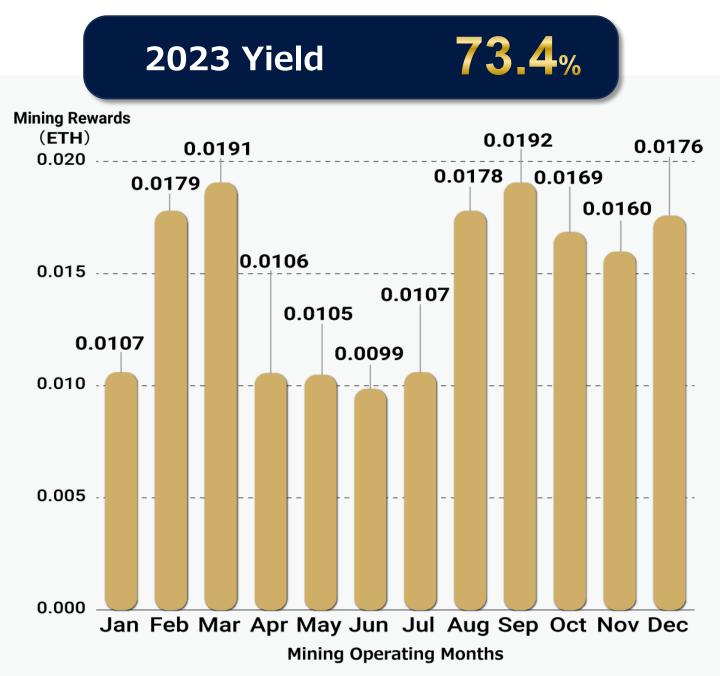

Amazing performance!

Web3 Maker® will be in its third year of operation in 2022. During this period, it has achieved steady results. In particular, the results for 2023 were very high, with a yield of 73.7%.

Web3Maker® Service site : https://web3maker.io/lp2

Challenges of Conventional Mining

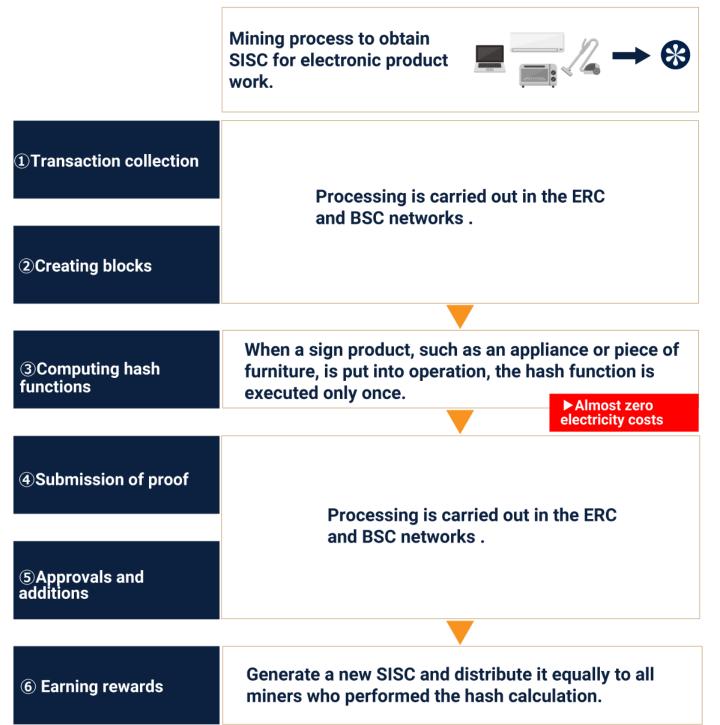

Conventional mining machines consume massive power, engaging in energy-intensive computational races. Their power usage rivals that of Malaysia, leading to high costs and significant environmental impact.

	Mining process that uses high power and only forms blocks to obtain BTC.		
①Transaction collection	Collect new bitcoin transactions made in the network		
②Creating blocks	Create a block containing details of the collected transactions and a hash of the previous block.		
③Computing hash functions	Apply a hash function to the block to get a hash value. Repeat with different nonces until the hash meets certain conditions. Equivalent to Malaysian		
	power consumption		
④Submission of proof	One minor who is able to find a hash value that meets the criteria submits the block to the network.		
⑤Approvals and additions	Other miners (miners) check the validity of the hash value and add it to the blockchain as a new block.		
⑥Earning rewards	One minor who successfully adds a block receives newly generated bitcoins and a transaction fee as a reward.		

Developed innovative mining methods.

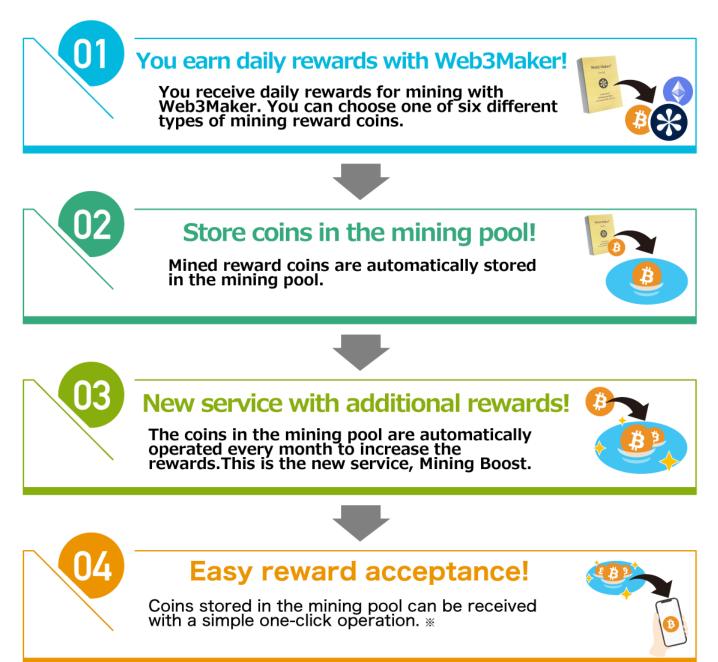

In contrast to conventional mining machines, 'Web3Maker®' offers a revolutionary system that avoids computational competition, allowing users to gain rewards with just one daily calculation. This energy-saving, competition-free approach redefines mining.

A bold leap in innovation, a world-first new service

Mining Boost is a revolutionary service that increases coins automatically by leaving them in the mining pool. It enhances the performance of Web3Maker, making it even more appealing to customers

%The service is only applicable to users of our product Web3Maker.

More mining rewards

Mining Boost offers several advantages. You can easily swap coins in the pool and switch to stablecoins to avoid losses before a price drop. Rewards are earned simply by depositing coins, with the projected annual return (APR) visible, enhancing the product's appeal to customers.

Pool Balance

The mining pool is an area where coins earned from daily mining are accumulated. Mining boost rewards are awarded indefinitely based on this balance. The projected annual percentage yield of this reward is expressed as an APR number.

BNB	0.27221351 BNB	apr 3.00 %	← CONVERT	~
USDT	27.09449376 USDT	APR 7.20 %	← CONVERT	~
USDC	27.09449376 USDC	apr 7.20 %	← CONVERT	~
BTC	0.00038252 BTC	apr 1.20 %	← CONVERT	~
ETH	0.00053781 ETH	apr 2.70 %	← CONVERT	~

Mining machine for professional investors!

Web3Maker[®] PRO is a revolutionary mining machine for professional investors, combining AI-based coin management.

The coins obtained from mining are operated with AI-based price analysis and the optimization of the portfolio in the mining pool is performed automatically.

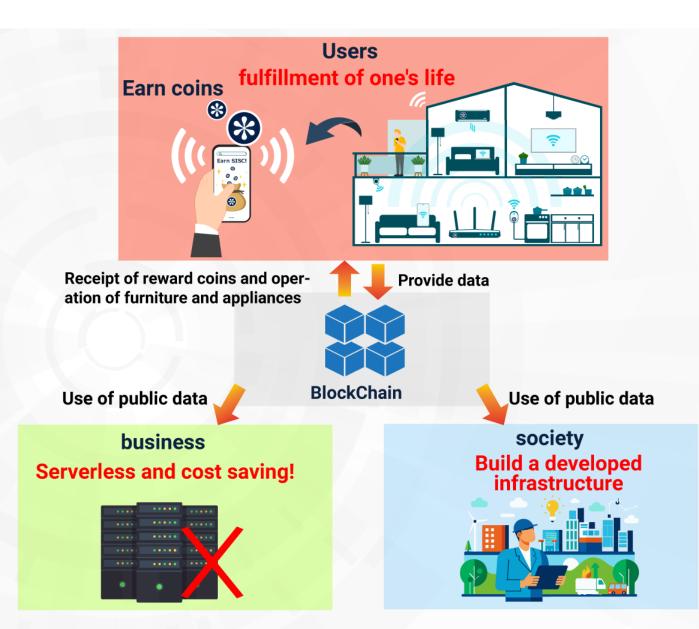

Web3Maker® PRO is the world's first ground-breaking product offered exclusively by the Shirushi Group with automatic management functions like ETFs and mutual funds, while accounting for the cost of purchasing the mining machine.

Better futures are achieved!

Using furniture and appliances equipped with Web3Maker®, a global public blockchain database will be created, enhancing human life and benefiting future space exploration. Users can earn coins while enjoying convenience, and society can utilize the database for more accurate weather mapping and observations, improving information accuracy.

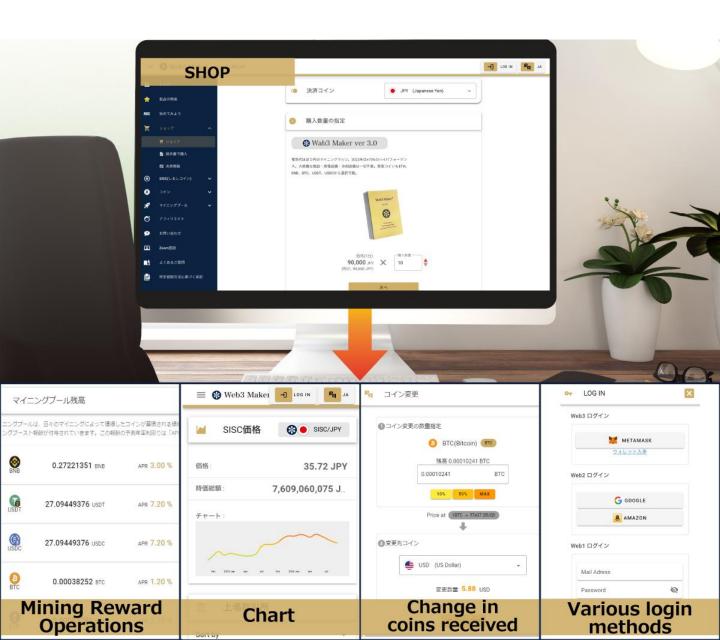

Practicality

Amazing one-stop mining! All with our own products and services!

Conventional mining involved sourcing parts and software from various companies and using exchanges for crypto assets. Shirushi Inc.'s website offers a one-stop service, providing all mining machines and coins. Users can easily purchase, operate, and convert rewards, with payments via crypto assets, bank transfers, or credit cards, and a 10% discount for SISC payments.

Coin

Crypto assets can be used to buy household goods and appliances! Amazing new EC mall !

Shirushi Inc. is planning to launch a new e-commerce mall, Shirushi Market. Currently, users who own crypto assets have limited use for them and find it difficult to purchase daily necessities. However, Shirushi Market will provide a mechanism for users to use crypto assets such as SISC and USDT to purchase everyday items such as detergent, rice and vegetables. Users no longer need to convert coins on exchanges, making it easier and safer to purchase commodities worldwide.

Buy

9:41 online Daily

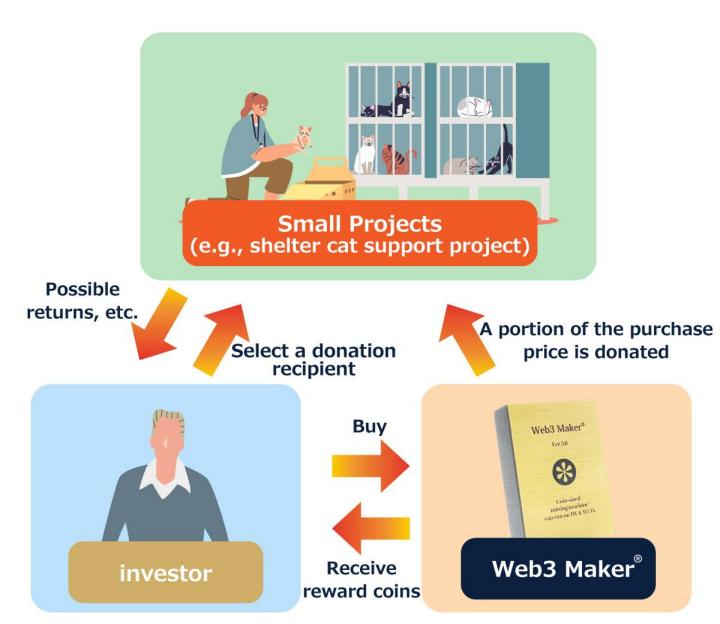

necessities

We must leave behind.

Support small projects!

The Shirushi Group provides a funding mechanism to support projects like beach clean-ups and shelter cats, allowing easier investor participation without requiring repayment. By purchasing Web3 Maker®, investors can support these projects, benefit from tax savings, and potentially recoup their investment, contributing to a better society.
