

SISC

Shirushi Coin

White Paper of Coin & Products

The price of the coin SISC continues to rise!

SISC (Shirushi Coin) is a cryptocurrency by the Shirushi Group, a Japanese Web3 semiconductor manufacturer. The group uses a portion of its semiconductor sales to purchase SISCs, thereby driving up the coin's price in line with the demand for Web3 semiconductors.

SISC price trends so far!

Since its launch in 2022, the price of SISC has risen steadily alongside Shirushi Group's product sales, at times reaching 6.5 times its initial value. The price is expected to continue increasing with the growing demand for Web3 semiconductors.

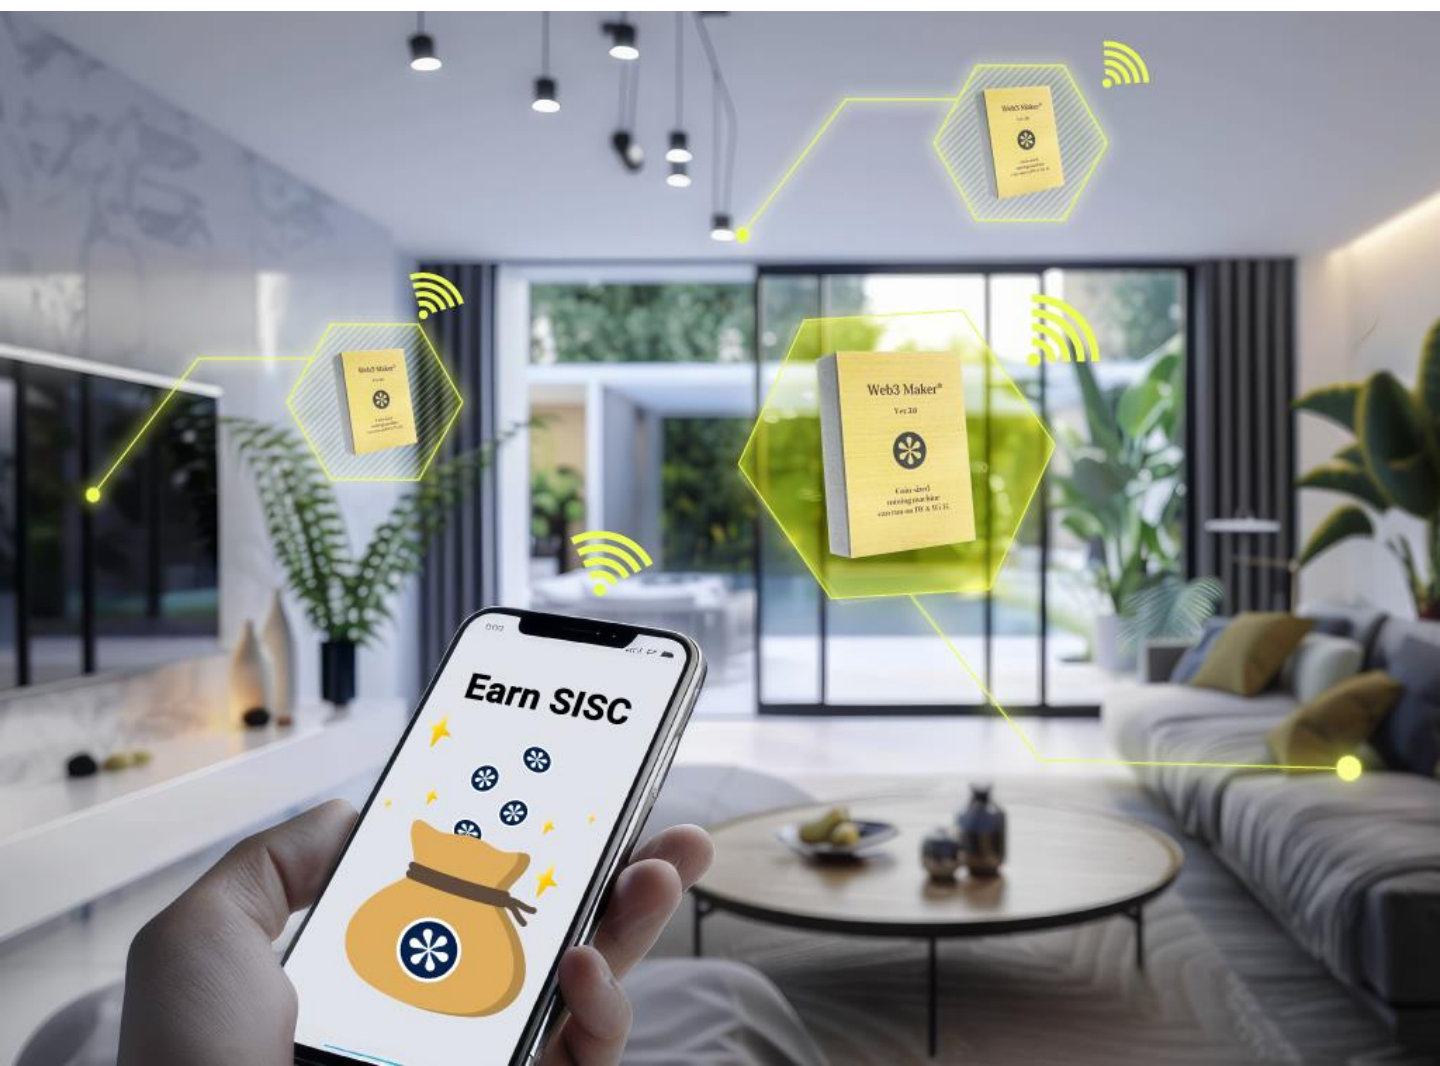

Blockchain as a necessity for life!

The Shirushi Group is bringing 'Earnable Home Appliances' to the world.

The 'Earnable Home Appliances' are home appliances that can be controlled via Web3 and can be mined for SISC!

Owners of these appliances can enjoy both rewards and a convenient life.

Already listed on major crypto asset exchanges!

SISC is listed on three exchanges:

‘BitMart’, ‘Uniswap’ and ‘Pancakeswap’.

SISC is listed on three exchanges:

‘BitMart’, ‘Uniswap’ and ‘Pancakeswap’.

SISC plans to list on more exchanges in the future.

BitMart:<https://www.bitmart.com/invite/VQ9pkq/en>

World's smallest mining machine

SISC can be efficiently acquired by mining with the 'Web3 Maker' mining machine by the Shirushi Group. The 'Web3 Maker', which is the same size as a coin, has many advantages over conventional mining machines, including almost zero electricity costs, no need for special equipment and high yields.

SHIRUSHI Inc.

SHIRUSHI Inc is a **FinTech venture** led by two managers who launched a crypto asset exchange and are experts in finance and technology with **a thorough understanding of the potential of blockchain technology**. SHIRUSHI Inc is a FinTech venture led by financial and technology experts who know the potential of blockchain technology. We will contribute to society by establishing a new decentralized value creation platform, the **"Web3 Economy," within 4 years**, utilizing the knowledge and technology of our management and hardware manufactured by our own company, which will be used not only in Japan but also around the world.

Manabu Sakurada (Representative Director and CEO)

- Responsible for planning and directing this project.
 - He is mainly active in the financial industry.
 - Held management positions in listed online securities, FX companies, and crypto asset companies in Japan
 - He also serves on the board of a financial publishing company.
- He has been deeply involved in the company
- He was deeply involved in the company from its inception and established its business foundation in Japan

Naoki Okura (President, COO and CTO)

- Engineer in crypto assets and hardware
- Advance your career as an engineer in the technology and financial industries
- Start-up member of a Japanese crypto asset exchange, involved in licensing activities.
- With its quirky ideas and forward-thinking spirit, the company continues to develop innovative products and lead the development of future technologies.

Practicality

Shirushi Inc sells its products on the online sales and management website <https://web3maker.io/>

(hereinafter 'the Website'), which is the world's smallest and lightest mining machine.

It is a Dapps (decentralised application) web3 site that provides a direct wallet connection to this site and enables payments without the need for a payment processor (bank or credit card).

Payment methods on the website include bank transfers, credit cards and payment by crypto assets.

Furthermore, if you choose to pay with Shirushi Coin (SISC), you can purchase products at a 10% discount.

In the future, the number of products available for purchase on this website will be expanded. Our own products under development, graphics cards, PC parts and other products will be available for purchase on our own e-commerce site.

Web3Maker is Shirushi Inc's flagship product and is a patented mining machine that approves new issues of Shirushi coins.

[Product instruction video] (Japanese)

<https://youtu.be/EybnvDq4CFQ>

The product currently on the market is Web3Maker Ver 3.0, which is already in its third generation since its launch.

It is an ultra energy-efficient mining machine with an almost zero electricity bill.

The actual yield in 2023 is 73.7%, and the number of units sold has exceeded 10,000 as the next generation of mining machines.

There is a choice of six coins to receive, including Shirushi coins. The mining machines are capable of receiving major coins such as BTC, ETH and USDT.

<p>Real Yield in 2023</p> <p>73.7% ※1</p> <p>(Including electricity)</p>	+	<p>Tax Merit in Japan</p> <p>Max 40% ※2</p> <p>Corporate tax + Consumption tax</p>	+	<p>Additional Reward</p> <p>Max 20% ※3</p> <p>Mining Boost</p>
<p>Total sales is over 10,000 units</p> <p>※4</p>		<p>Patented in Japan</p>		

Receivable coins can be expected to rise.

Mining boost

Mining Boost is a revolutionary service that allows you to simply leave coins in the mining pool and they will increase on their own.

Our revolutionary service operates in virtual currency markets such as lending, staking, farming, quant trading, etc., and grants coins in addition to mining rewards. It also includes the ability to change coins within the mining pool.

It is possible to change from BTC to USDT and ETH to USDC.

By changing to a stable coin before a falling market for the virtual currency arrives, it is possible to avoid a fall in the coin.

By incorporating this service, customers who have purchased our Web3Maker will see an increase in performance on their machines, making our product even more attractive.

Pool Balance

The mining pool is an area where coins earned from daily mining are accumulated. Mining boost rewards are awarded indefinitely based on this balance. The projected annual percentage yield of this reward is expressed as an APR number.

	0.27221351 BNB	APR 3.00 %	 CONVERT  PAYOUT	▼
	27.09449376 USDT	APR 7.20 %	 CONVERT  PAYOUT	▼
	27.09449376 USDC	APR 7.20 %	 CONVERT  PAYOUT	▼
	0.00038252 BTC	APR 1.20 %	 CONVERT  PAYOUT	▼
	0.00053781 ETH	APR 2.70 %	 CONVERT  PAYOUT	▼

Web3Maker® PRO

Web3Maker® PRO is a revolutionary mining machine for professional investors, combining mining with AI-based coin management.

Conventional mining machines require miners to send the coins they receive to exchanges themselves for sale when they want to convert them.

Timing the sale of coins in the mining business is very difficult.

Web3Maker®PRO uses AI-based price analysis to manage the coins generated by mining for absolute returns in USD, JPY and USDT.

The product automatically optimises the portfolio within the mining pool.

In rising markets, the product aims for capital gains by holding BTC, ETH and BNB, and performs lending, staking and quant operations to increase the value and volume of coins. In falling markets, we aim to improve returns with stable income gains by holding USDT and USDC, and through high-yielding lending quant operations.

Web3Maker®PRO is the world's first groundbreaking product that only Shirushi Inc can offer, combining automatic investment functions like ETFs and mutual funds, while purchasing mining machines and recording the costs.

In order to improve the utility of Shirushi Coins (SISC), Shirushi Inc. is opening an e-commerce mall where crypto asset payments can be made.

It is called Shirushi Market.

At Shirushi Market, customers can shop with SISC as well as the major crypto assets BTC, ETH and BNB.

When customers make purchases with SISC, they can buy products at extremely low prices compared to typical e-commerce sites.

When customers shop at SISC, they need to obtain SISC in one of the following two ways.

- (i) Purchase SISCs on the market.
- (ii) By purchasing products that Shirushi Inc. sells, Receive SISCs.

If a large number of customers use Shirushi coins to purchase goods on the Shirushi Market, they can purchase high-quality goods at a price significantly lower than the market price.

Shirushi Inc devised Shirushi LIFE, a service that gives form to our technological capabilities and ideas.

Tokens can be used to store value or exchange goods, but the opportunities to use them in real life are currently limited.

As an example, if you could receive a digital gift of at least five hamburgers every month simply by purchasing and operating our 'Web3Maker', you could realise a life simply by owning and operating our products.

Shirushi LIFE is a revolutionary service that allows you to directly receive various goods and services that you need in your daily life.

If the price of Shirushi Coins increases, you can eat eight hamburgers this month and ten next month.

By combining the Shirushi Market and Shirushi LIFE, you will be able to get all the goods and services you need in your daily life if you have Shirushi Coins in your possession.

NFT Marketplace

We are pleased to announce the release of the NFT Marketplace, which will allow NFTs to be accessed and traded not only in Japan, but also from all over the world.

It is a seamless cross-border trading platform where both legal tender and crypto assets can be purchased.

Our NFT Marketplace also features a crowdfunding function. A new type of funding scheme [IMO] (Initial Machine Offering), which combines three technologies and mechanisms - mining x NFT x crowdfunding - will be implemented.

[IMO] grants NFTs as an extra when a mining machine is purchased.

The rewards generated from the mining machine are added to the price of the NFTs that came as an extra when the machine was purchased, thereby increasing the price of the NFTs.

Profit can be earned by selling the increased NFTs.

Crowdfunding using this mining machine is a hybrid type of crowdfunding, where you can fund the projects you want to support while also earning revenue from the mining machine.

This can only be achieved by Shirushi Inc, which has hardware manufacturing technology and has developed the world's smallest mining machine called Web3Maker.

Technical and patenting strategies to support the Shirushi Coin.

Expanding the economy by seizing patents and trademarks in three web sectors.

Mining machine tokens formation
Patented (Patent 7402445)

Management device for e-commerce websites
Patent (Patent 7454903)

Operation, coin conversion and lending at service sites.
(Patent application PCT/JP2024/023531)

Mining Boost

マイニング報酬を放置でドンドン増やす!
年間最大 **20%**.

2024-2026.
More than 10 patents on web3, blockchain and advanced technologies to be granted

Web3 Maker®

- Mining machines that form the token economy. The price of coins falls, the machines become less popular and the economy cannot be built up.
- The structure supports initial price formation by including the cost of buying the coins in the selling price of the product.

WEB1 · WEB2 · WEB3 Functional crypto-asset payment-enabled EC

- Wallet connection directly to the e-commerce site, enabling payment without the need for a payment processor (bank or credit card).
- On the other hand, there is still a need for social login, invoicing and ID/PW login.
- The only EC to support three login methods

Mining boost

- With the rise of crypto assets, our service enhances customer convenience by managing and converting coins generated in the mining pool.
- Additionally, customers can use these coins as collateral for loans in JPY and other currencies.
- This functionality applies not only to mining pools but also to service sites where ownership is retained by the provider.

Shirushi Inc Patented technology under conception

- Mining machines with AI-automated operation.
- Purchase of financial instruments in virtual currency
- Connecting to the blockchain
- Made in Japan dedicated semiconductors
- Truly decentralised databases with automatic control by AI.

Token economy

Token Economy

The maximum supply of Shirushi coins (1) ~ (4) is 200 million (100 million initial issue and 100 million additional issue). The initial issuance will be used to provide liquidity, investor ownership, marketing costs, and development costs. The additional issuance will be issued and supplied by mining.

【Initial Offering】

(1) Liquidity supply ... 10%

(2) Investor ownership ... 70%

(3) Marketing costs ... 10%

(4) Development costs ... 10%

【Additional Offering】

(1) Supply by mining... 100%

【 Initial Offering 】

(1) Liquidity Supply - 10%.

This is the percentage of tokens used by investors for market making and liquidity pooling to ensure stable trading on the exchange.

(2) Investor ownership ... 70% ...

Percentage of coins offered to initial investors.

Tokens purchased on the exchange are rarely sold in the first place, as they are transferred to SHIRUSHI Inc for the purchase of goods and used for settlement. In addition, when sales of our mining-related products occur, SHIRUSHI Inc.

purchases a certain amount of Shirushi coins on the market, which is a major buying factor in the rise of Shirushi coins. As a result, investors are more likely to use the coins than to own them in the hope that they will increase in value.

(3) Marketing costs . .10%.

To cover audit and legal fees incurred in connection with the release of this coin, listing costs, and public relations expenses to raise awareness of Shirushi Coin.

(4) Development costs ... 10% ...

This percentage of the Coins will be used to pay for the development of cutting-edge technologies such as software and hardware. The value of the Coins will increase dramatically with the development and success of the following technologies.

* Software

SHIRUSHI Inc. working to reduce the size and power consumption of its products and is developing a product that will allow IoT devices to be equipped with a token generation function and that will work on human reward circuits by receiving tokens and is developing software to be used in this product.

* Hardware technology

We are developing original products with a token generation function that do not exist anywhere else in the world. We are developing thermometers and hygrometers with a token generation function, drones, and IoT devices with a voice reading function. We will combine blockchain technology and IoT to develop new products that have no name in the world. We are also embarking on research and development of quantum computers.

* Materials Technology

Our materials are used in the research and development of semiconductor materials that improve computer performance and materials suitable for cooling and power saving.

* Energy Technology

This technology will be used for the development of green energy generators and devices focusing on power saving.

【Additional Offering】

(1) Supply by mining - 100%.

SHIRUSHI Inc. launched the world's smallest and lightest mining machine, Shirushi Miner, in November 2022.

The product has been approving and processing (mining) new token issuances since November 1, 2022, with 20,000 Shirushi Coins paid daily in the first year as compensation for processing on **Web3Maker**.

The supply will increase as additional Shirushi coins are issued, but Shirushi miners have a mechanism to absorb the increase in supply caused by additional issuances, since the more **Web3Maker** are sold, the more Shirushi coins are bought.

In the future, by diversifying and collaborating on products for sale, it will become easier to purchase tokens than to sell machines alone, allowing users to receive tokens without being aware that they are purchasing a Mining Machine.
